Stocks Visualization

作者: 范良栋

liangdong.fan.stats@gmail.com

1 Introduction

This is a comprehensive visualization of mainly CSI300 companies in China stock market.

As one can see in the charts, there are candle-stick chart, trend indicators, momentum indicators, etc. and vast explanation of these indicators can be found online.

2 Features

可以逐页浏览或者用"Ctrl" + 关键字. 以下是黑体是可以用于搜索的关键字.

2.1 Search on Returns' Percentile

For returns (calculated on close price), there are R1, R5, R20 and R60 for 1, 5, 20, 60 day returns, respectively. The R1Q (R1 percentile) values are calculated from **today's** R1 values.

Example(回报率百分位): for 5-day return with a relatively low value (10%-20%), one can search "**R5Q=1**". For around median values, try "**R5Q=5**".

Example(回报率): For returns, one can search "**R5=3**" to see some recent stocks with 3% growth in 5 days.

It is pretty handy, but may not be the most efficient.

2.2 Search on Crossovers

The price, MACD and KDJ crossovers are included with a total number in the file.

Example(交叉图形): One can search "**Crossover=**", "**CROSS_KD**", "**CROSS_PRICE**" or "**CROSS_MACD**".

2.3 Search on Candle Stick Patterns

The key words are from https://github.com/DataSmoother/candlestick-patterns.

Example(经典形状): One can search

bearish_engulfing, bearish_harami, bullish_engulfing, bullish_harami, dark_cloud_cover, doji, doji_star, dragonfly_doji, gravestone_doji, hammer, hanging_man, inverted_hammer, morning_star, morning_star_doji, piercing_pattern, rain_drop, rain_drop_doji, shooting_star, star.

3 Discussion

篇幅有限，主要以沪深300股票为主。 The indicators and charts are created to the best of the author's knowledge, but there might still exist discrepancies.

4 Disclaimer

None of the patterns, indicators, charts or results in the file is a guarantee of investment performance. This file and the author are NOT responsible for any loss in your investment. Please use it at your own risk. 本作者，文章及网站不承担任何投资风险。
